OFFICE OF LEGISLATIVE COUNSEL

Tuesday - 11 September 1962

1. [redacted] Jack Leahy, Congressional Relations Office of State Department, called to say that Chairman Oren Harris, House Commerce Committee, has talked with the House Rules Committee and obtained a rule for House consideration of H.R. 11732 next Monday. Representative H. Allan Smith, of the Rules Committee, has indicated he will suggest an amendment to the bill on the floor requiring that a Presidential determination be made in each case where the operation of a radio transmitter in the United States by a foreign power would not be against the national interest. Smith also asked specifically what the Agency's views were on this subject. He was informed the Agency supported the bill and it was suggested that he contact this office if he desired further information on this. Leahy suggested that if we agreed it might be helpful if we took the initiative in contacting Smith on this.
